

# What's in Bloom

## *Opuntia violaceae macrocentra* (Purple Prickly Pear)

This southwest United States native blooms exuberantly in early summer.

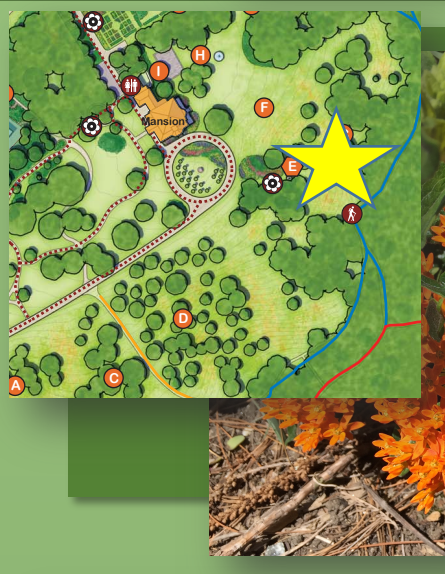

Where: Worthley Garden

## *Cornus kousa* (Kousa Dogwood)

This Asian dogwood blooms in late spring/early summer, after the plant has leafed out (in contrast to our native dogwood, which blooms on bare branches).

Where: Several species are planted near or in the Ryer Garden.

## *Asclepias tuberosa* (Butterfly Weed)

Native to the eastern United States, this plant is the essential host plant for Monarch Butterflies.

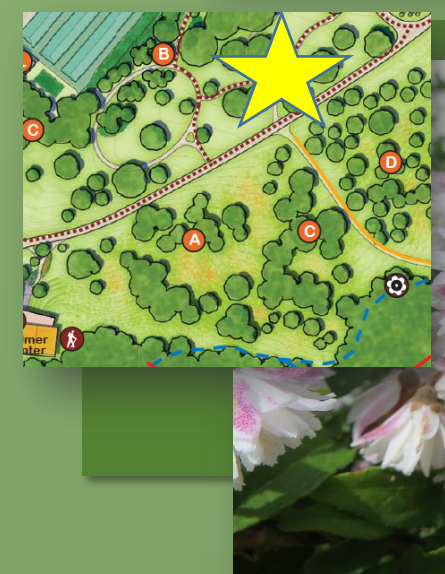

Where: Worthley Garden and Rain Garden.

## *Spigelia marilandica* (Indian Pink)

A native of Maryland, this plant's brilliant red flowers attract hummingbirds and wildlife alike.

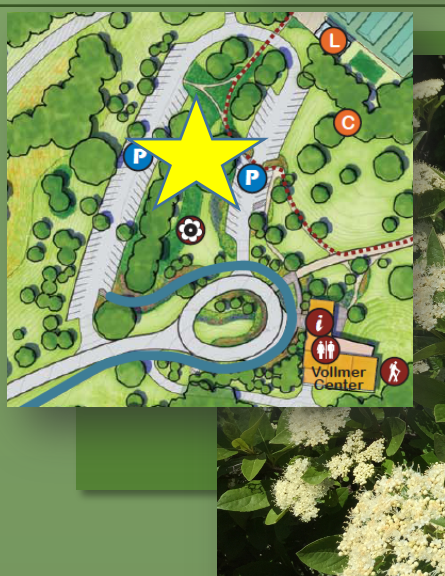

Where: Front of the Vollmer Center

## *Deutzia scabra* 'Codsall Pink' (Pink Deutzia)

A prolific bloomer, this shrub has long, draping branches with flowers beginning as pink and becoming white.

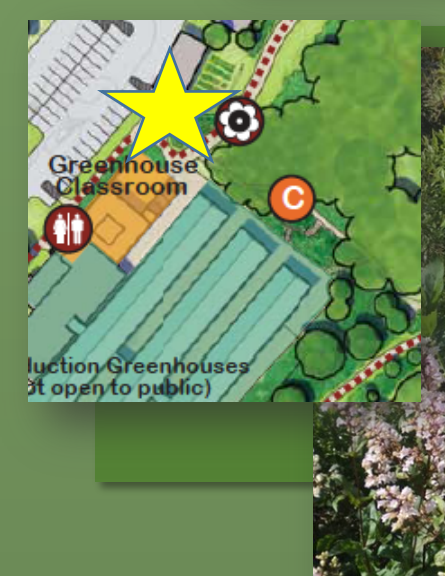

Where: Along Flowering Shrub Walk, just east of the greenhouses.

## *Viburnum nudum* 'Winterthur' (Possumhaw Viburnum)

A native viburnum known for its ornamental flowers in June, flaming red fall foliage and attractive blue berries in the fall.

Where: Upper Vollmer Parking, north end.

## *Penstemon digitalis* 'Husker Red' (Beardtongue)

This perennial is an excellent pollinator attractor, with multiple flowers on tall stems.

Where: Rain Garden

# Coming Attractions
